## Leke Onile-ere

### SUMMARY

- Recent Computer Science Graduate with a year of experience in a software development environment
- Experience in using multiple languages in a web environment such as JavaScript, PHP and python
- Actively seeking software development roles in order to increase knowledge and gain new skills

### EDUCATION

**Computer Science (Software Engineering) BSc with Placement (Hons)** | Brunel University London | Sep 2016 - Jun 2020 | 1<sup>st</sup> Class Honours

**3 A Levels** (Maths, IT, Physics)

### SKILLS

- |            |              |              |
|------------|--------------|--------------|
| • Python   | • JavaScript | • jQuery     |
| • HTML/CSS | • ReactJS    | • PHP        |
| • SQL      | • NodeJS     | • PostgreSQL |
| • Git      | • MongoDB    |              |

### EXPERIENCE

**Full Stack Web Developer (intern)** | UKEAS (Taipei, Taiwan) | May 2019 - August 2019

- Added features to an online service designed to aid students in finding university places abroad using **PHP** and **jQuery**
- Created a feature to help counsellors easily edit the scores of each individual university
- Set up a new development server including docker containers and user permissions.

**Software & Support Engineer (Intern)** | KindMinds Innovations Inc. (Taipei, Taiwan) | Sep 2018 - April 2019

- Initialised development on a Work Prioritisation **OpenProject** Plugin using **Ruby-on-Rails**
- Used **Python** in order to modify Odoo (OpenERP) modules to better suit the requirements of the company
- Used my knowledge of HTML and **CSS Frameworks** to redesign the company website improving the look and consistency as well as making the website mobile responsive
- Gained experience in the **Agile** process by participating in sprints and relaying my progress on the tasks assigned to me to the rest of my team.

**Digital Intern** | Stagecoach (London, United Kingdom) | Aug 2016 - Aug 2016

- Managed **CMS** system to make sure the company website was properly localised
- Learnt about the inner workings of the company and improved my **timekeeping** and **scheduling** skills

**Digital Intern** | Chemistry Communications Group (London, United Kingdom) | Jul 2010 - Jul 2010

- Spent time in many different departments of the company such as IT, Creative and Accounts
- Acquired a basic understanding of the **Adobe Creative Suite**
- Was involved in the **development** process of bringing an idea from conception to final product

### PROJECTS

**ThinkFit** | Final Year Project (Brunel University) | 2020

Utilised the **MERN** stack in order to create a fully functional web-based fitness application as part of my final year project for my degree

**Python Database Scraper** | DRS | 2019

- Utilised Python in order to create a script that would connect to the company database, retrieve JSON files and then unpack and format the data in a way that I could easily import the information into the OpenERP application.

**Tic-Tac-Toe** | Individual Project | 2018

- Recreated the popular game Tic-Tac-Toe using **Python** and **Tkinter** to create an accompanying GUI
